

PROJECT NAME: LINKO
TEAM MEMBERS: COROIU SEBASTIAN-DANIEL

IDEA IN SHORT:

LinkO connects elderly people, or their relatives, with verified nearby volunteers for essential daily support such as medication pickup, groceries and short check-ins, through a simple and intuitive mobile app.

Hardcore Entrepreneur hackathon 6.0

1.PRODUCT - PROBLEM WE SOLVE

LinkO connects elderly people who need help with nearby verified volunteers for essential tasks such as medication pickup, groceries and short check-ins.

Problem:

Many elderly people face limited mobility, isolation and difficulty asking for fast, trusted help.

Solution:

A simple app where an elderly person or relative creates a request, a nearby volunteer accepts it, communicates through chat and completes the task safely.

2. OUR TARGET GROUP & [SDGs](#)

Primary users: Elderly people 65+ who need support with medication, groceries or daily check-ins.

Proxy users: Relatives, neighbours or caregivers who request help for an elderly person.

Volunteers: Young people 16–35, especially students and local community members, willing to complete short nearby tasks.

Potential partners:

Pharmacies, NGOs, municipalities, supermarkets and CSR programs.

SDGs:

SDG 3 – Good Health, SDG 10 – Reduced Inequalities, SDG 11 – Sustainable Cities, SDG 17 – Partnerships

3. SMART OBJECTIVES

S – Launch a controlled local pilot focused on medication pickup, groceries and check-ins.

M – 3-month pilot targets:

50 elderly/proxy users,
100 verified volunteers,
300 completed requests,
under 30 min average response time,
80%+ user satisfaction.

A – The app already has a functional backend, accounts, live sync, chat and request tracking.

R – The pilot addresses a real need validated through user surveys and pharmacy-field feedback.

T – May 2026: final demo & validation.

June 2026: partner/volunteer recruitment.

July–Sept 2026: local pilot.

Oct 2026: evaluation and expansion plan.

4. PRICE

Core service:

Free for elderly users.

Revenue & sustainability:

CSR sponsorships – companies sponsor community support for vulnerable elderly people.

Municipality / NGO partnerships – LinkO as a tool for local volunteer coordination.

Pharmacy & supermarket partnerships – awareness campaigns, QR codes and sponsored local pilots.

Grants – social innovation, digital inclusion and active ageing funds.

Optional caregiver premium – paid features for families, such as request history, priority notifications and extended monitoring.

5. PROMOTION

Phase 1 – Validation:

Short surveys with potential volunteers and families.
Feedback from a person in the pharmacy field.

Phase 2 – Local pilot:

Recruit volunteers through schools, universities and student communities.

Reach elderly users through relatives, pharmacies, NGOs and local community groups.

Phase 3 – Trust-based growth:

Flyers and QR codes in pharmacies/community spaces.

Partnerships with NGOs, municipalities and CSR sponsors.

Publish pilot results: completed requests, response time and satisfaction.

Phase 4 – Expansion:

Replicate the model in other Romanian cities after the pilot proves safety and demand.
